What is a Nielson Peel?

Our signature Nielson Peel is a three-in-one treatment that features ProFractional, BBL and Erbium lasers working together to correct sun damage, age spots, wrinkles, Rosacea, large pores, uneven skin texture and acne scarring.

What are BBL, Erbium and ProFractional Lasers?

ProFractional uses a laser micro-beam that treats pinpoint areas of your skin. The laser energy creates thousands of microscopic channels in the skin, which are surrounded by areas of healthy, untreated skin. The zones of untreated skin invigorate the body's natural healing process, and stimulates collagen production, plumping and smoothing the skin.

Profile BBL broadband light technology utilizes the power of pulsed light for photo rejuvenation therapy. The light energy delivered by the BBL gently heats up top skin layers and stimulates skin cells to generate new collagen.

Our Erbium micro-laser peel precisely ablates the outer layers of the skin to correct scarring, keratoses and even pigment problems.

What's unique with a Nielson Peel?

Most aesthetic laser treatments

BEFORE

AFTER

use only one technique to create smoother, younger-looking skins. The Nielson Peel utilizes varied laser approaches during your visit to ensure you get optimal results.

How many treatments do I need?

For optimal results, we recommend three Nielson Peels, over a six-month period. However, treatments can be customized for your specific needs and problem areas.

Will it be uncomfortable?

Sensitivity varies from patient to patient. However, topical anesthesia is used and other measures taken before, during and after a procedure to ensure the discomfort is minimal.

What kind of recovery can I expect?

Following the procedure, you will experience redness, blood spots, some stinging and itchiness. Healing typically takes 3-4 days.

What special care will I need?

After your procedure, your skin will be more sensitive, especially to the sun and UV light. We have sunscreens and other products that will help you care for your skin and maintain vibrant results.

What conditions can be treated with the Nielson Peel?

- Acne Scarring / Pock Marks
- Fine lines and wrinkles
- Age spots
- Small facial veins
- Rosacea
- Redness and flushing
- Freckles
- Brown spots
- Birth marks
- Port wine stains
- Red spots
- Enlarged pores
- Burn Erythema
- Hyperpigmentation

Testimonials

“After having the Nielson Peel, I had no more freckles and my skin looked like I took 10-15 years off.”

~ Carri, Texas

“My face feels revived, and my friends have noticed a fresher look! The freckles and brown spots are gone and my skin looks and feels younger.”

~Kristina, California

“The ProFractional treatment has greatly reduced my acne scars that have been bothering me for years. I feel a lot more confident about my appearance now.”

~Paul, Texas

“My skin is definitely clear, as far as texture goes. The crepe-y lining is gone. The firmness of my skin is great – especially around the chin area. I think this is the most amazing procedure that is available in the world of cosmetic dermatology.”

~Brenda, Texas

About us

For more than 14 years, cardiothoracic surgeon David Nielson, FACS, MD, has helped thousands through minimally invasive surgical procedures. As Founder of the Rosacea Institute of Texas, Dr. Nielson has perfected the use of laser technology for procedures that rejuvenate the skin, energize the body and create a more beautiful and younger look.
